

With the world in lockdown due to Covid-19 and our beloved industry struggling to function effectively, we must all temporarily adapt and find new ways to reach our audience - an audience which is waiting.

Starved of shows long planned and robbed of the usual myriad choice of festivals, we have a mass audience simply desperate to see live music.

At Siyan, we're attempting to address this situation proactively and have customised our production space to create a fully functioning streaming studio. Whether it's a singer/songwriter or a five-piece rock band, Siyan Streaming will offer artists across the live events industry the opportunity to play live music for an eagerly awaiting fanbase.

Comprised of cutting-edge tech and accommodated within our modest but ample, fully black boxed ground support system, we feel that the facilities Siyan Streaming has on offer will be a turn-key solution for your artist's live streaming needs and will give an anticipating audience just a little of what they deserve.

# Siyan Streaming

Siyan has been a leading player in the live events industry since 2001. We've worked with many of the biggest names in the business, from Amy Winehouse to ZZ Top, via Coldplay, Adele and many more.

We have decades of experience of concert touring, festivals and special events, and we use that knowledge and experience to enhance the service we offer our clients.

The production space comes fully kitted with all the technology you need to make your live stream a success. As you'd expect from one of the industry's best loved lighting companies, we've got a top spec lighting rig installed to provide stunning visuals for the true gig experience as well as excellent key light for camera. Our Resolume media servers allow us to show both stock visual graphics and effects or your own custom content on the video wall.

## Option 1: Live Streaming

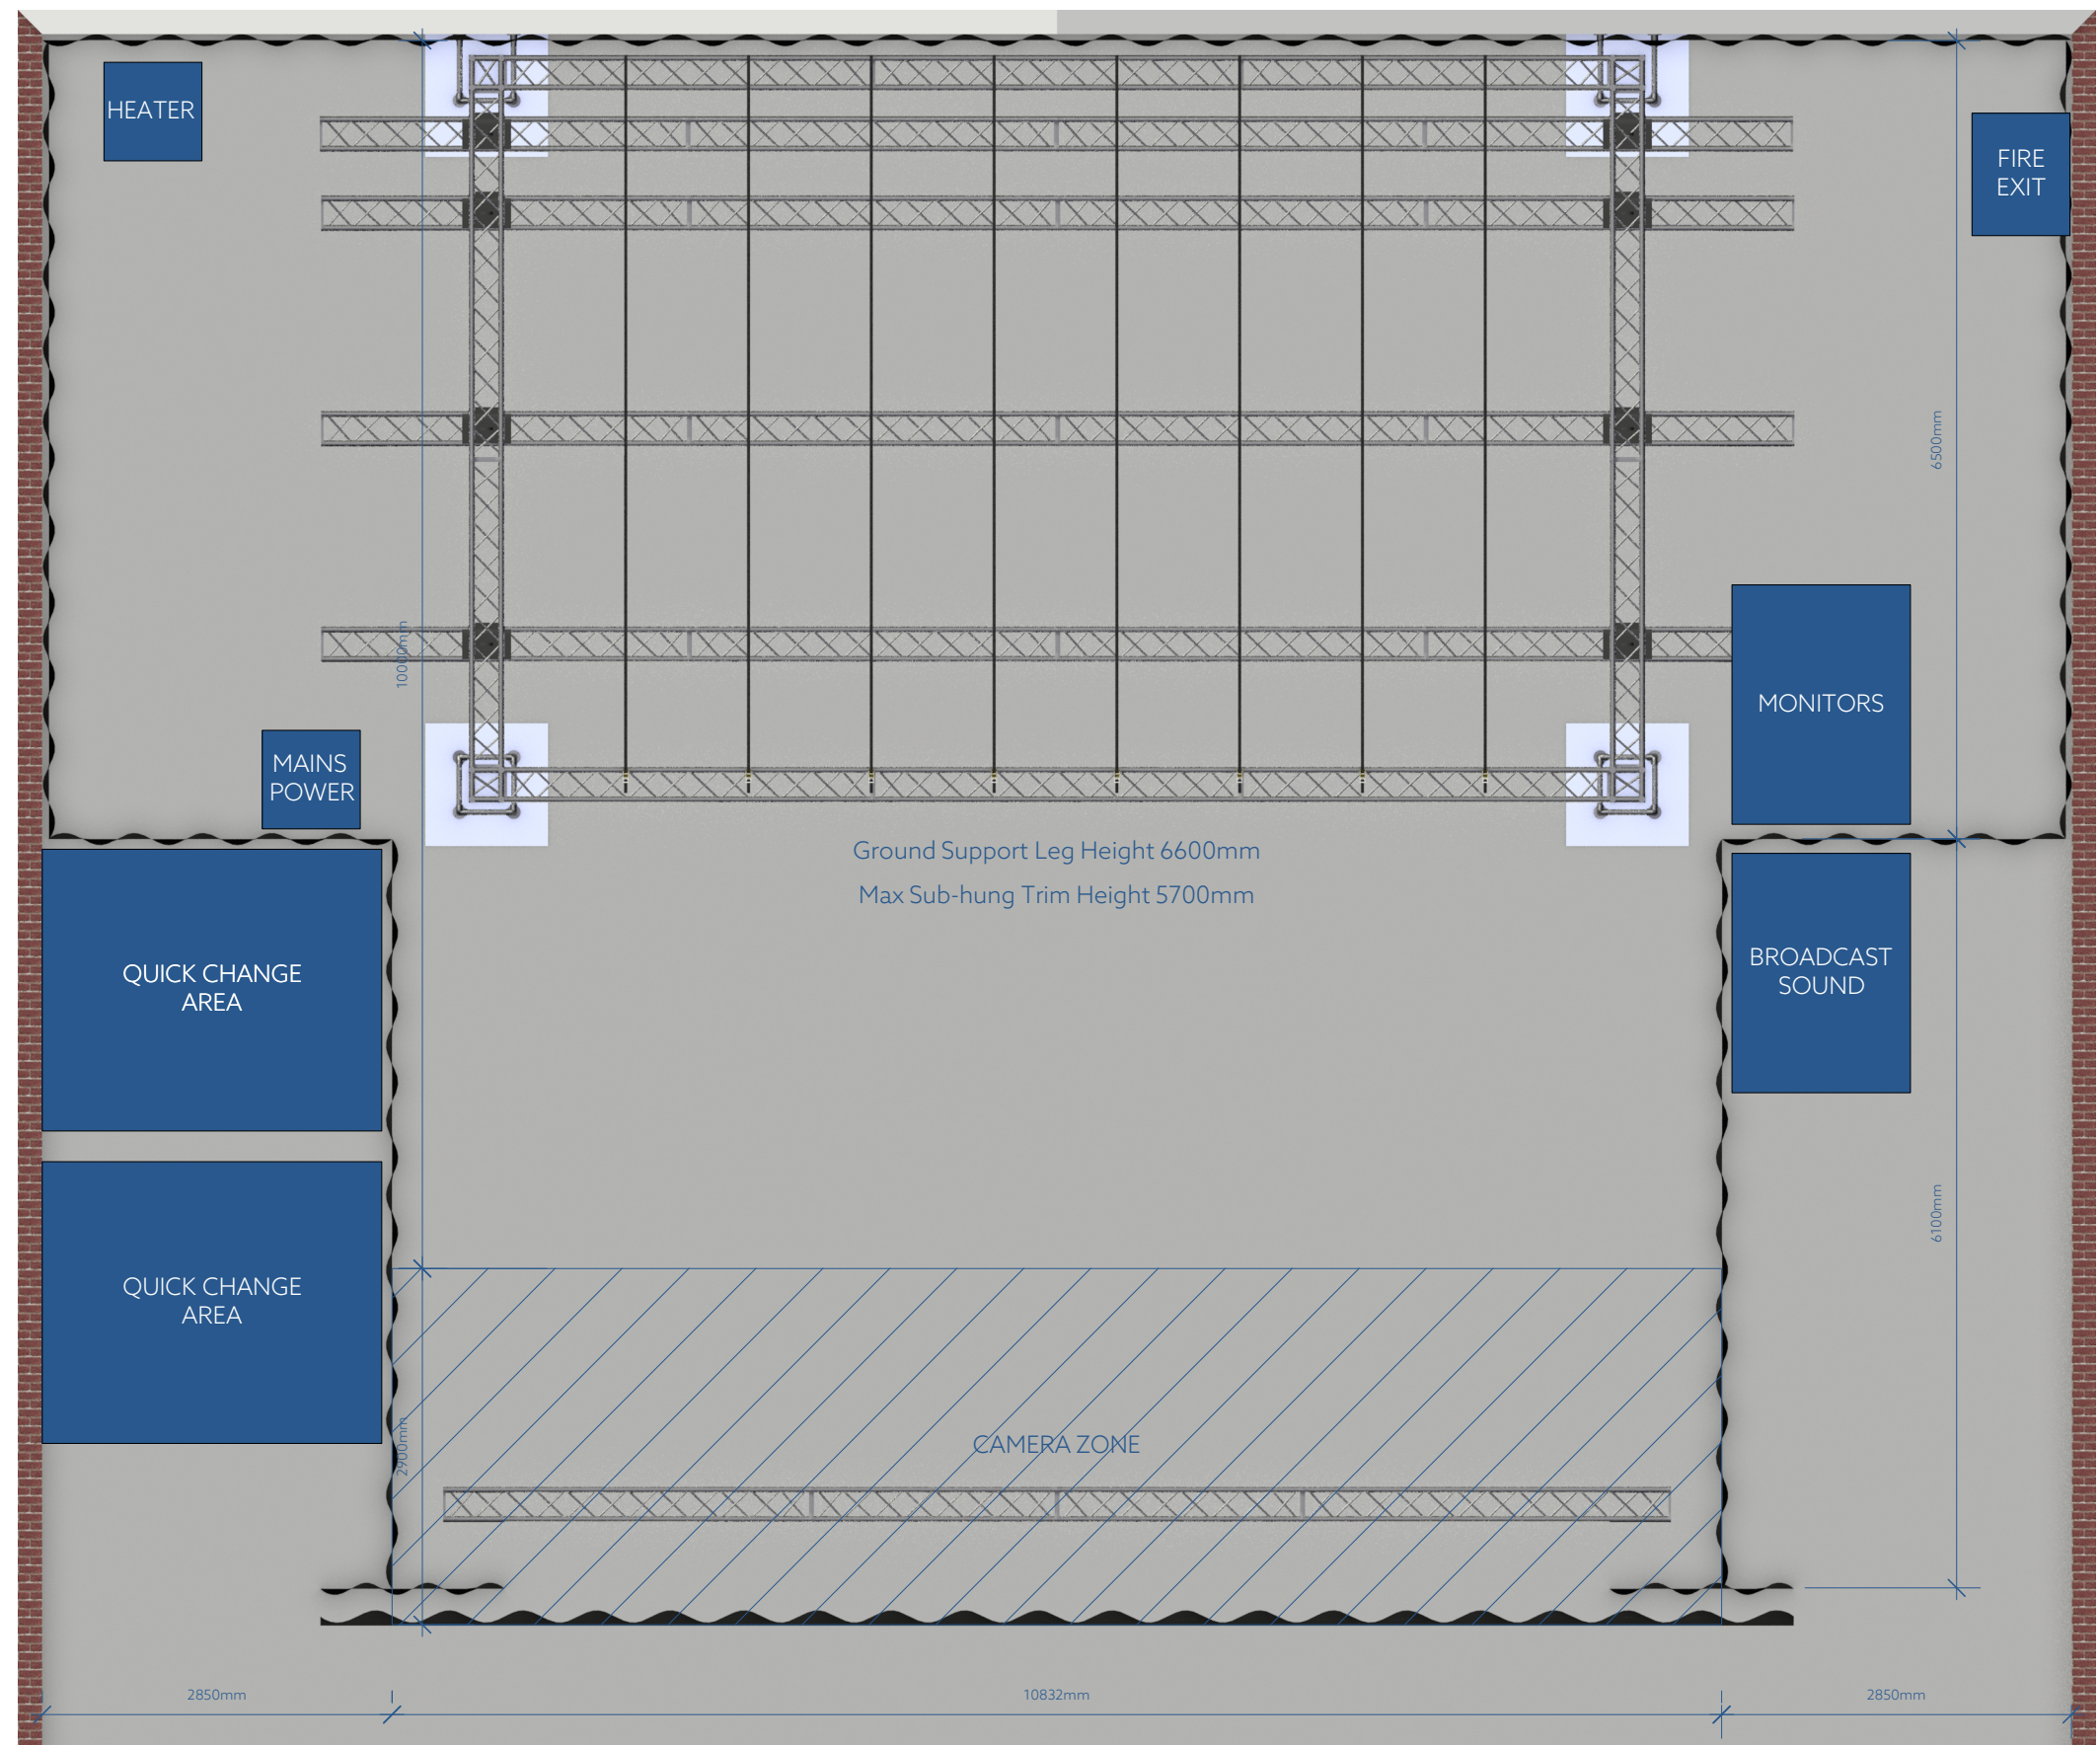

Utilising our fibre internet connection, we live stream your set to your social media channels, video streaming software or any online platform of your choice.

## Option 2: Show Recording

We record your performance to hard disk, which you can take away to use later on. You could upload footage to social media, share it online or release it as a traditional music video

## Streaming

Working with key industry partners, we're also in a position to provide a standard festival style audio package, with common industry standard microphones and DI boxes provided. You are of course welcome to bring your own.

With Midas Pro series consoles for both broadcast and monitors, along with up to 12 ways of wireless IEMs, our house engineers will take good care of you throughout the session, or you're welcome to bring your own engineers with you.

Please talk to us about your specific requirements, we are able to arrange alternative consoles if you prefer, or if you want to bring your own complete audio package we can facilitate that too.

No streaming solution would be complete without a camera package. With years of experience of providing IMAG solutions to concerts and festivals across the UK, Siyan's HD camera PPU system is based around a Roland V800 MkII, and up to 8 HD cameras – with a mixture of static locked off shots and operated cameras possible.

The use of unmanned cameras as well as the powerful zoom lenses fitted to our High Definition cameras means we can get intimate close up shots, all while maintaining social distancing!

With our high spec encoding PCs and fibre internet connection, we can live stream your event straight to any social media or video sharing platform of your choice.

Alternatively, we can record your set to hard disk, which you can take away to stream later. This also makes us the perfect choice if you're looking for somewhere to record music videos, as well as for gigs and concerts.

### Social distancing info:

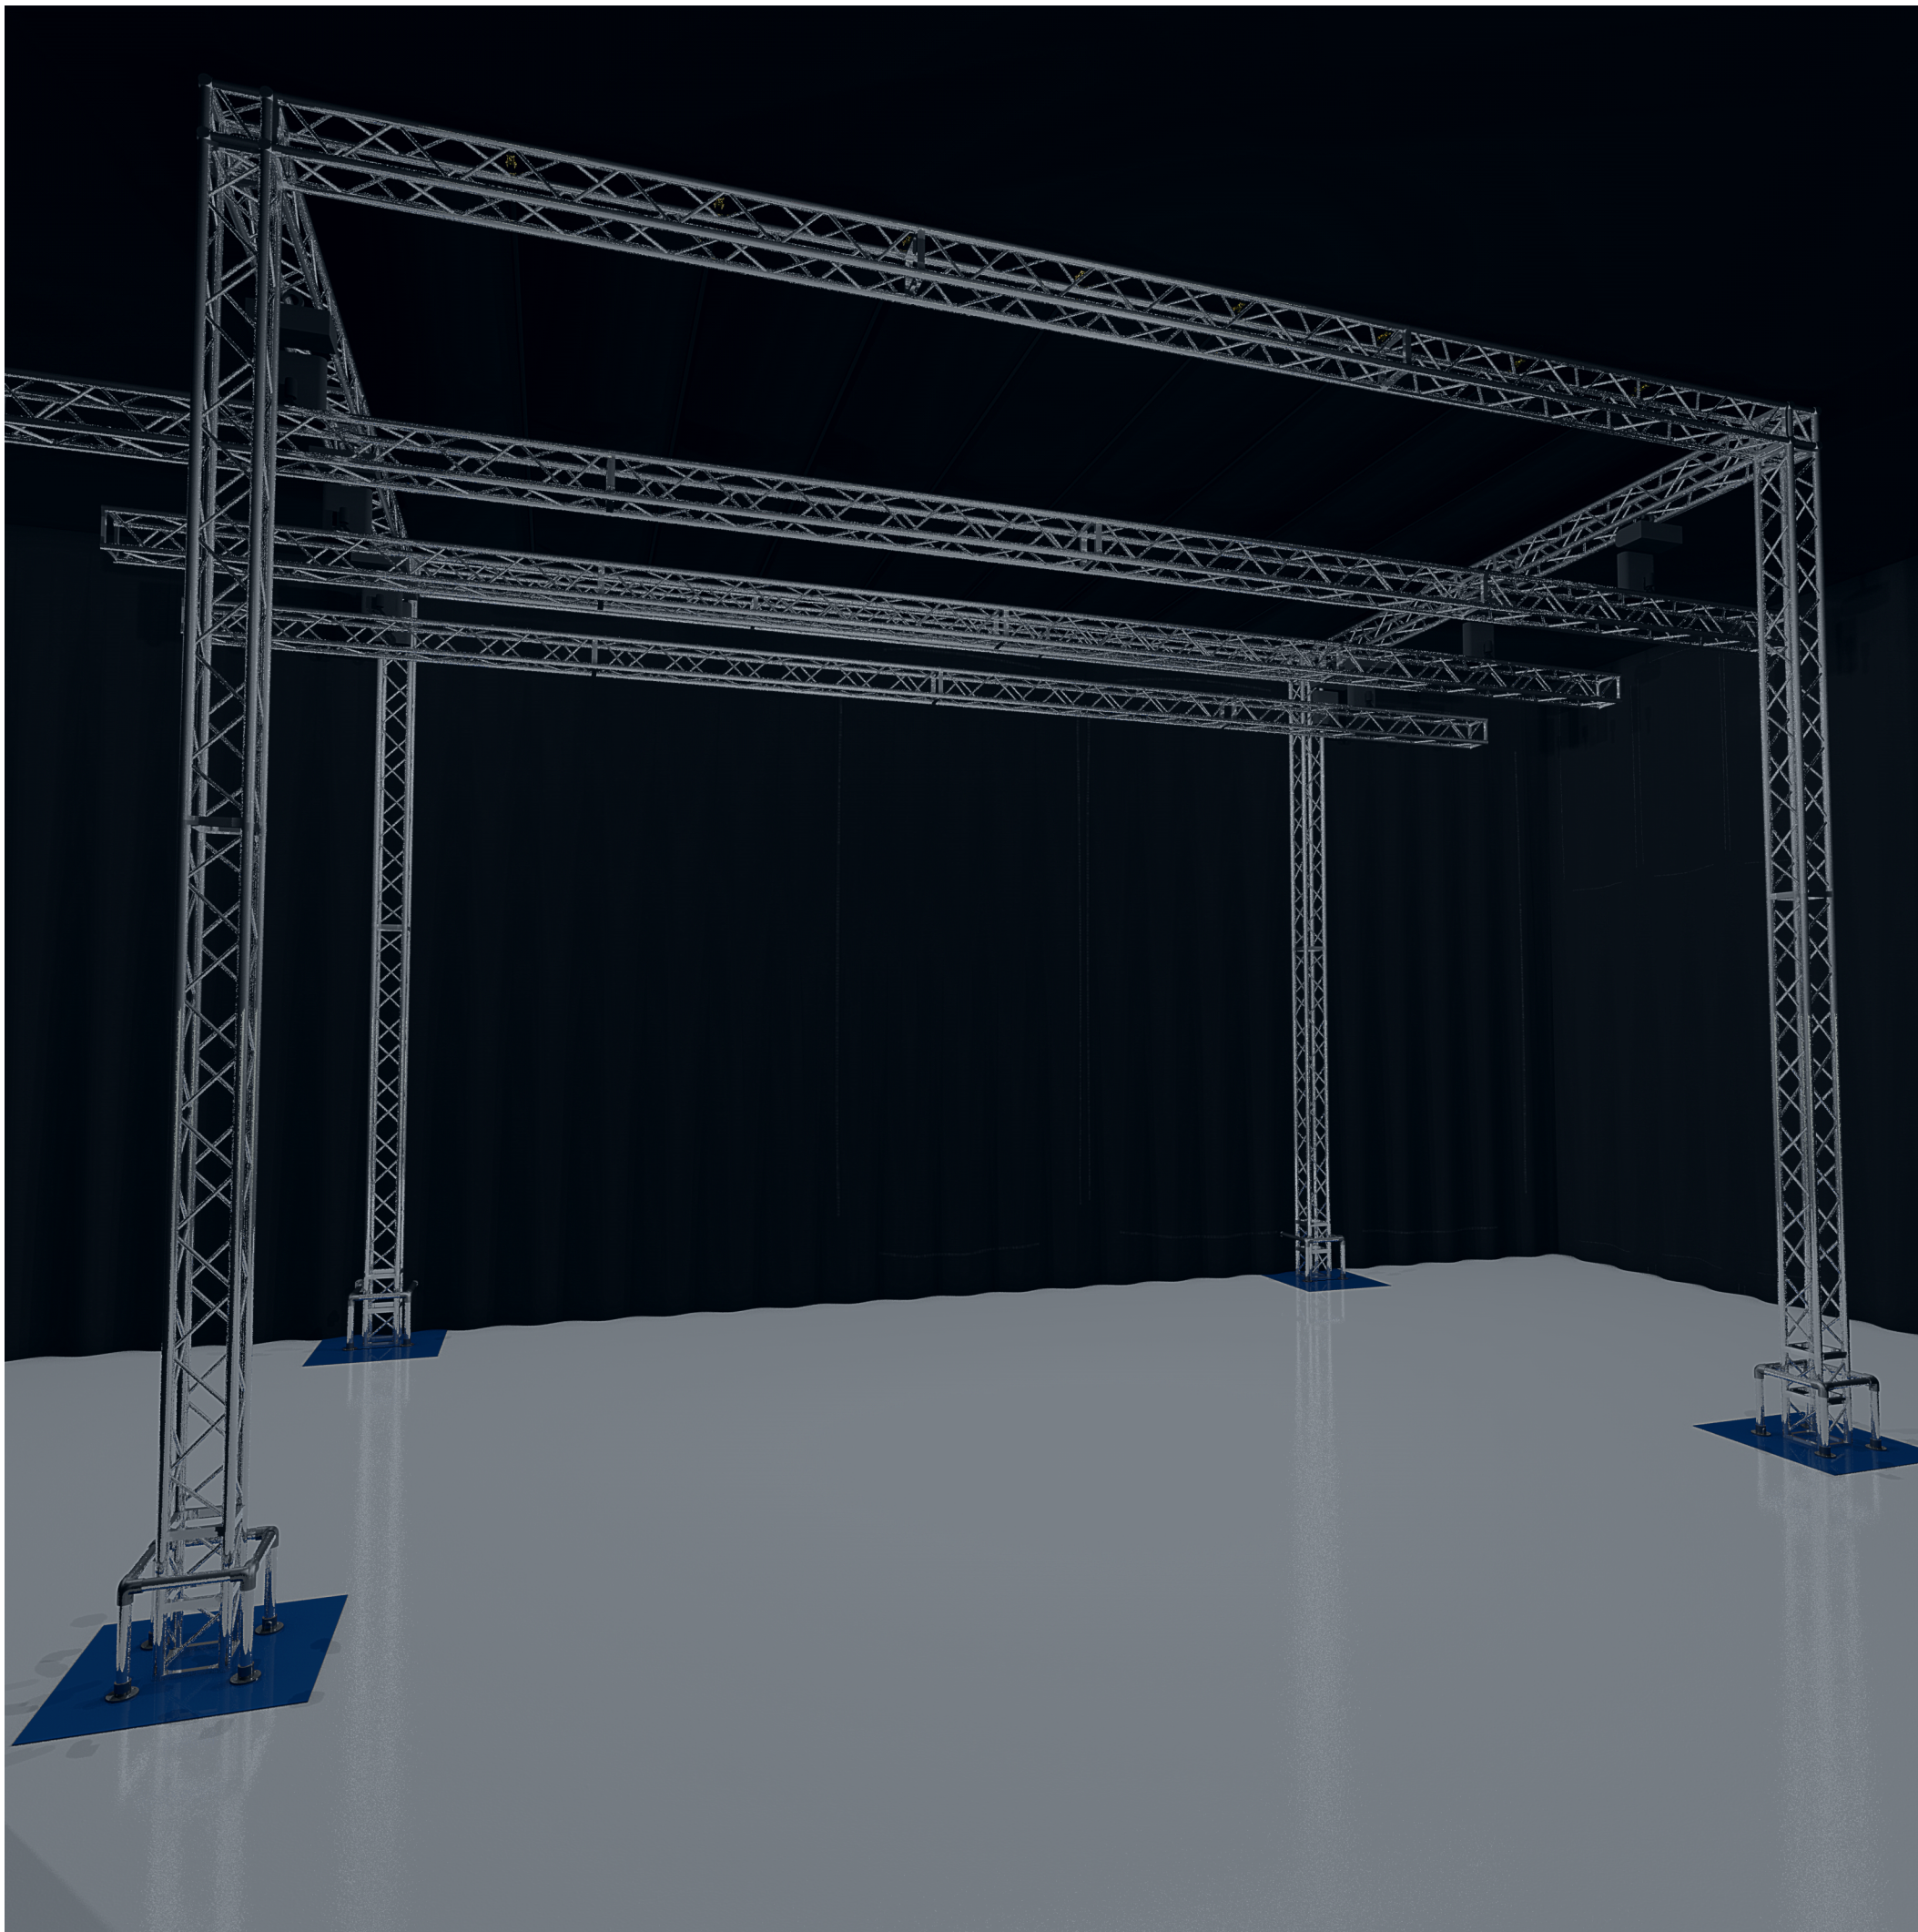

We continue to follow government guidance and so until the ban on all non essential travel is lifted we are not able to welcome guest performers to Siyan. However if you are interested in using our facilities over the summer or later in the year, do get in touch so we can all start sharing the magic of live music with audiences around the world as soon as possible!
